

**Notes** on Multipack site design.

The next Multipack event should be an article with classes: next, multipack & event. If it is to be displayed at the top of the page it should have a class of folded, which automatically hides and resizes content. Any block level element with class 'event' will display reasonably well.

The content of each article can be identical wherever it is on the page – the CSS will change the styling based on this. For example, the 'upcoming' section with a list of the next events. Each li contains the exact same content as the full article elements, but most of the content is turned off.

Classes of multipack, leampack, staffspack and presents are there to provide styling to individual events.

Page sructure (from top working down)

### **Homepage.**

Next Event (any type) - folded.

Main introduction to Mutlipack (with navigation).

List of upcoming events.

Footer.

### **Multipack/Leampack/Staffspack/Presents.**

Next Event (any type) - folded.

Introduction to this meetup.

Detailed (.focus) view of next event of this meetup - unfolded.

Footer.

Any links to 'map & details' should go to that meetup's page, and scroll to the event focus article.
